

Saeed Farhadi

Email: saeedfarhadi@proton.me

Portfolio: saeedfarhadi.com

I make websites and web applications, from planning and UI/UX design, to full-stack development, deployment and maintenance, my main focus is on the development side.

Experience:

Nasbino  Designer and Full-stack Developer

03/2023 – 09/2024

I designed, developed, and deployed a platform at the request of a door manufacturing company, for door installers to create an online profile, showcase their work, and find customers. This web app makes it easy for users to find a suitable door installer based on their area and the type of door, they can also leave reviews and rate the installers. I was the sole designer, developer, and maintainer of this project, and it's entirely hosted on a Rocky Linux VPS, including the database, admin panel, analytics panel and the front-end.

Philosophize This!  Designer and Full-stack Developer

10/2022 – 02/2023

"Philosophize This!" is one of the most revered philosophy podcasts on the internet, and my own favorite, as a challenge for myself, I created a better version of its homepage. It is incrementally server-side generated, which leads to great SEO and visibility, and lightning-fast performance. It's equipped with an audio player with persistent playback when navigating to different pages, a quick search, transcripts and links to listen on different podcast players.

Military Service: Office manager – reception – driver

02/2021 – 10/2022

Some of the skills I learned during my [mandatory] service in the military: resilience and adaptability, resourcefulness, cooperation and effective communication with people of different backgrounds, team-work and managing groups of people, administrative systems and hierarchy in various organizations.

Self Employed: Designer and Full-stack Developer

06/2019 – present

I designed and developed more than 50 sample projects in order to learn all kinds of technologies, starting from WordPress and PHP but soon moving on to React and NextJS, as a result I currently host 4 full-stack web applications on a Rocky Linux VPS. I work with passion and strive for the highest quality and I'm always trying to learn more and to keep growing.

Skills and Technologies:

Proficient in: JavaScript & TypeScript, Html & CSS, Sass, styled-components, ReactJS, NextJS, Linux administration, Nginx, PostgreSQL, Figma, AdobeXD, Strapi, ChakraUI, Shadcn, GraphQL, Apollo, TanStack-query, Umami analytics.

Familiar with: Python, RemixJS, React Native, Expo, Zustand, ExpressJS, Ollama, ORM, Clerk, Stack-auth, Tailwind.

Languages: English, Farsi -- learning Norwegian and Estonian.

Education:

Architectural Engineering Ashrafi University, Esfahan, Iran

06/2019

Bachelor's degree in Architectural engineering, what I learned (related to web development): understanding problems and necessities and coming up with creative solutions, design principles, planning and managing large projects.
